

Momentum Helps Streamline Financial Processes at Northern Kentucky Convention Center

Overview

Managing events in multiple systems, including financials, was a challenge for Northern Kentucky Convention Center (NKYCC). Here's how Momentum helped consolidate their operations into one system.

Organization:

Northern Kentucky Convention Center

Industry:

Convention & Exhibition Centers

Headquarters:

Covington, Kentucky

The Challenge

NKYCC was working with multiple systems to manage their events and financials. Because they were using many systems, this led to data duplication and made it hard to get a complete overview of revenue, expenses, and purchasing.

“Momentus’ software had been used for booking and events. Our revenue numbers were entered in UDFs in Momentus’s software to record and estimate revenue,” said Helen Malone, Director of IT Services. “Our accounts payable, accounts receivable, and financial reporting were managed in Quickbooks. Customer invoices were manually created in Quickbooks and purchasing was managed with a spreadsheet and paper or email.”

The Solution

NKYCC implemented Momentus’s ERP and Financial Suite solution.

“This allowed for updated views in Momentus to use formula fields to pull real data from. It also removed many UDFs that were manually entered to provide more accurate and accountable data,” Malone said.

And with this solution, NKYCC also got an automated paperless purchasing system with electronic approval capabilities and purchasing history.

The Result

Momentus’ ERP and Financial Suite solution helped NKYCC gain better visibility of the overall business with real-time information and a meaningful dashboard. It also consolidated the multiple systems they were using before and helped to streamline their processes across the organization.

“Momentus’ software had been used for booking and events. Our revenue numbers were entered in UDFs in Momentus’s software to record and estimate revenue,” said Helen Malone, Director of IT Services. “Our accounts payable, accounts receivable, and financial reporting were managed in Quickbooks. Customer invoices were manually created in Quickbooks and purchasing was managed with a spreadsheet and paper or email.”
