

Extraordinary moments.

Momentum platform

CAMPUS EVENT MANAGEMENT SOFTWARE

The Momentum cloud-based platform provides a modern user experience for students and staff to reserve spaces, request services and plan events on university and college campuses.

Transform venue management campus wide.

Achieve campus-wide visibility and control of all event spaces, including sports complexes, conference services, continuing education, camps and more to improve efficiency and lower risk.

Capture, track and measure event operations, improve communications and generate more revenue with an integrated calendar and booking platform.

Join Harvard University, Duke University, Boston College and many more higher education institutions who use our platform to run campus events.

Unite your departments with one campus management software platform to streamline processes and produce more revenue.

One Calendar

Manage all venues and events from one campus-wide calendar to improve visibility and efficiency.

Maximize Safety and Security

Centralize venue activity in one place and easily share with staff, contractors, police and security.

Automate Processes

Eliminate rekeying information between multiple systems and access data from the mobile web app.

Real-time Space Booking

Accurate, centralized and real-time venue availability reduces risk of conflicting bookings.

Manage Complex Events

Rely on the #1 venue management platform to efficiently manage complex events and reduce risk.

Software Integrations

Integrate with academic scheduling and other key software applications with the standard API.

It's time to deploy Momentus.
